

## **José Cano Rodríguez**

José M. Cano (1971) holds a PhD in Industrial Engineering from the University of Oviedo (UO). Since 2019, he has been a University Professor in the Department of Electrical, Electronic, Communications, and Systems Engineering at this institution.

His research activity focuses on energy systems, with a special emphasis on smart grids and the interconnection of distributed resources. He is the author of more than 30 JCR publications in prestigious journals in his field and over 90 conference contributions. He has participated in numerous research projects funded by public tenders, notably the National Research Plan, where he was the Principal Investigator of 8 projects. He has been involved in over 80 technology transfer (TT) contracts and is the inventor of 3 patents and a registered and licensed software product. He has been a visiting professor at the University of British Columbia and has taught at the University of Bologna.

Since 2017, he has been an associate editor of the IET Power Electronics journal. Currently, he is the Scientific Area Manager for Energy at the Spanish State Research Agency. He has been contracted by the European Commission as an evaluator in various tenders and regularly collaborates with other European and American agencies. He is a senior member of IEEE, where he participates in different working groups. He has held several individual positions at UO, where

he also coordinated the master's in Electrical Energy Conversion and Power Systems from 2019 to 2023.
